Experience

Automee – Poland (Remote) <i>AI and Automation Expert</i>	Jul 2024 – Jan 2025
<ul style="list-style-type: none">Led development of AI-powered solutions for 12+ international clients, from consultation to deployment.Developed and deployed custom AI agents and conversational voicebots (inbound/outbound) to automate key business processes, such as meeting confirmations and client follow-ups.Collaborated with multinational teams across Poland, Philippines, and India.	
Soul AI – India (Remote) <i>AI Trainer</i>	Mar 2024 – May 2024
<ul style="list-style-type: none">Trained and evaluated LLMs, creating domain-specific datasets for RLHF fine-tuning.	

Education

National Institute of Technology, Srinagar <i>B.Tech in Computer Science</i>	Nov 2022 – Present
<ul style="list-style-type: none">Secured admission with 98.73 percentile in JEE Main.	
Burn Hall School <i>Class XII & X</i>	Completed Feb 2022
<ul style="list-style-type: none">Achieved 98.6% in Class XII, among the top students in the state.	

Projects

LLM.md Builder – VS Code Extension for AI Context Generation	Github — Marketplace
<ul style="list-style-type: none">Developed a VS Code extension to automate the generation of comprehensive Markdown context files from codebases, optimizing them for Large Language Models.Designed a sophisticated filtering engine that respects .gitignore rules to intelligently exclude irrelevant files, binaries, and directories.Tech Stack: TypeScript, Node.js, Visual Studio Code API, Git.	
AI Gallery Studio – Intelligent Photo Management App	Github
<ul style="list-style-type: none">Engineered an intelligent photo gallery app using Gemini AI and Google's Genkit to enable automatic organization, blurry image detection, and natural language search.Implemented a storage-efficient backend with duplicate image detection and a privacy-centric feature for secure, one-click deletion of all user data.Architected a secure sharing system with time-limited links that snapshot gallery data, ensuring link persistence even if source images are modified or deleted.Tech Stack: Next.js, TypeScript, React, Node.js, MongoDB, Gemini AI, Docker, Tailwind CSS.	
MinSo – Real-Time Social Media for Humans & AI	Github
<ul style="list-style-type: none">Developed a full-stack social media app with real-time chat and notifications via WebSockets, and designed a dual-purpose API to support interactions from both human users and AI bots.Containerized the entire stack (React, Node.js, PostgreSQL) with Docker, enabling seamless one-command deployment and simplifying the development environment setup.Tech Stack: TypeScript, React, Node.js, PostgreSQL, WebSockets, Docker.	

Technical Skills

Languages Go, Python, C
Frontend HTML, CSS

Backend & OS FastAPI, PostgreSQL, linux
DevOps Docker, Git, Zapier

Community Involvement

DreamDay Srinagar – Hack Club Game Jam <i>Organizing Team Member</i>	Sep 2025
<ul style="list-style-type: none">Served as a technical mentor at DreamDay Srinagar, the first-ever game jam in the Kashmir Valley, supporting participants with game design, debugging, and rapid prototyping.	
Code Day Kashmir – International Hackathon <i>Technical Mentor</i>	July 2025
<ul style="list-style-type: none">Mentored young aspiring developers at the inaugural CodeDay Kashmir, the region's first international coding event, providing hands-on guidance on project ideation and fundamental programming concepts.
